

Chamber, 10mm Cuvette Holder

- Small chamber designed to hold standard 10mm path, 4.5ml cuvettes
- Great for liquid-liquid IFT work
- Custom “J” needles and caps are available for bubble-up work
- Or, the holder can be inverted to handle a straight needle from below using FTA tubing assemblies
- An internal loop provides temperature stabilization with user supplied circulating bath
- Temp. range of below ambient to 200°C depending on bath, fluid, fittings and cuvettes
- Two 12mm diameter windows provide light passage
- Mounting hardware for FTA1000, FTA200 and FTA188
